Baris Kasikci

Assistant Professor Electrical Engineering and Computer Science University of Michigan

 $4820~\mathrm{BBB}$ 2260 Hayward Street Ann Arbor, MI 48109, USA +1 (734) 763-1560 barisk@umich.edu

http://web.eecs.umich.edu/~barisk

RESEARCH INTERESTS

My research is centered around developing techniques, tools, and environments that help developers build more reliable, secure, and efficient software. I am interested in developing techniques and building systems that allow programmers to better reason about their code. I am also interested in system support for emerging hardware platforms, efficient runtime instrumentation, hardware and runtime support for enhancing system security, and program analysis.

EDUCATION

Ecole Polytechnique Fédérale de Lausanne (EPFL)

Lausanne, Switzerland

Ph.D. in Computer Science

Sep. 2010–Dec. 2015

Thesis: Techniques for Detection, Root Cause Diagnosis,

and Classification of In-Production Concurrency Bugs

Advisor: Prof. George Candea

Middle East Technical University (METU)

Ankara, Turkey

Sep. 2002-Jun. 2006

M.Sc. in Electrical and Electronics Engineering

Sep. 2006-Jun. 2009

Thesis: Variability Modeling in Software Product Lines

Graduated with the top grade Advisor: Prof. Semih Bilgen

B.Sc. in Electrical and Electronics Engineering

Project: Embedded Target Estimation, Detection, and Tracking

Graduated with High Honors Advisor: Prof. Arzu Koc

AWARDS AND HONORS

Outstanding Reviewer Award, WWW	2017
Patrick Denantes Memorial Prize for outstanding PhD thesis, EPFL	2016
EuroSys Roger Needham Award for Best PhD. Thesis in Computer Systems in Europe	2016
Intel Corp. Software and Services Group, Grant	2014 – 2016
VMware Inc., Doctoral Fellowship	2014 – 2015
EPFL, Doctoral Fellowship	2010-2011
Scientific and Technological Research Council of Turkey, Master Scholarship	2006-2008
Middle East Technical University, Dean's High Honor List	2006
Middle East Technical University,	
Award for Best Team Performance, Undergraduate Final Project	2006
Turkish Customs Association, Scholarship	2002 – 2006

Funding

Intel Faculty Award, Automated Performance Optimization, 75K USD, PI 2018

Intel Gift, SysTEX'18 Workshop Sponsorship, 2K USD, PI 2018

Michigan Cambridge Research Initiative, 15K USD, PI 2018

Applications Driving Architectures, 1,245M USD, PI 2018

Intel Faculty Award, Performance Debugging, 75K USD, PI 2017

EMPLOYMENT

University of Michigan	Ann Arbor, Michigan, USA
Assistant Professor	Sep. 2017–present

Electrical Engineering and Computer Science Department

Microsoft ResearchCambridge, United KingdomResearcherAug. 2016–Aug. 2017

Research on computer systems and networks

Ecole Polytechnique Fédérale de Lausanne (EPFL)

Postdoctoral Researcher Research on software security Lausanne, Switzerland

Dec. 2015-Jul. 2016

• I developed infrastructure that relies on hardware support to improve software security.

Research Assistant Sep. 2010–Dec. 2015

Research on software reliability with an emphasis on concurrent software

- I developed **Gist**, the first technique for accurately, efficiently, and automatically diagnosing the root causes of in-production failures, by using a combination of static and dynamic program analysis.
- I developed RaceMob, the first automated in-production data race detection technique that can be kept always-on and provides high accuracy, by combining static data race detection with adaptive, crowdsourced dynamic data race detection.
- I developed **Portend**, a high-accuracy technique to classify data races according to their potential consequences under arbitrary memory models, by using symbolic program analysis to explore multiple program paths and schedules to determine the effects of data races.
- I developed Bias-Free Sampling, a technique that allows efficient sampling of rarely executed code (where bugs often lurk) without over-sampling frequently executed code, by using a new sampling algorithm and existing hardware support.

Intel Corp. Santa Clara, CA, USA Research Intern Jul. 2015-Sep. 2015

Automated root cause diagnosis of failures and security enhancements using hardware support

- I developed a tool that allows developers to determine which program statements operate on a given data type at runtime using a mix of static program analysis and hardware support. In our experiments, this tool reduces the number of statements to examine during debugging by an order of magnitude. This tool is being extended internally at Intel.
- I began investigating hardware support for enhancing system security, in particular, efficient path profiling for auditing and detecting control flow hijack attacks.

VMware Inc. Palo Alto, CA, USA

Research and Development Intern

Automated debugging and runtime control flow tracking

Jun. 2014-Sep. 2014

- I implemented a runtime for efficient control flow tracking in software. This work formed the basis of my **Gist** work on root cause diagnosis.
- I designed and implemented an infrastructure to remotely debug and profile VMware VCenter virtual machine management software, while it is running in production. This infrastructure is used by VCenter developers at VMWare.

Microsoft Research Redmond, WA, USA Research Intern Jun. 2013-Sep. 2013

Efficient runtime execution sampling technique and low overhead coverage measurement

- I worked on the design of the Bias-Free Sampling framework for efficient runtime sampling. I designed and implemented the bias-free sampling framework for managed code (i.e., C#). This tool is internally used at Microsoft.
- I designed and implemented a fault injection tool to detect resource leakage problems using dynamic binary instrumentation.

Siemens Corporate Technology

Senior Software Engineer

Embedded home and industrial automation software

Istanbul, Turkey Mar. 2008–May 2010

• I designed and implemented a real-time embedded gateway software between Siemens communication processors and a building automation system using C++ on top of VxWorks.

Aselsan Electronic Industries

Ankara, Turkey

Software Engineer

May 2006-Mar. 2008

Embedded motor control and functional testing infrastructure

• I was responsible for a real-time embedded control software for turret motor control. I also designed and implemented a full-system functional testing software using C++ on top of VxWorks for Power PC architectures.

Student Intern

Jun. 2005–Jul. 2005

Embedded software development

• I developed embedded control software for a night vision camera using C++ and PIC assembly on a PIC microcontroller.

Extended Review Committee

Intl. Conf. on Architectural Support for Programming Languages and Operating Systems (ASPLOS) 2018

Shadow PC Member

EuroSys Conference on Computer Systems (EuroSys)	2013, 2015
--	------------

External Reviewer

Symp. on Operating Systems Principles (SOSP)	2011. 2013
EuroSys Conf. on Computer Systems (EuroSys)	2011, 2012
USENIX Annual Technical Conf. (USENIX ATC)	2011
Intl. Conf. on Compiler Construction (CC)	2017
Workshop on Hot Topics in Operating Systems (HotOS)	2011, 2013
Conf. on Innovative Data Systems Research (CIDR)	2013
Intl. Conf. on Dependable Systems and Networks (DSN)	2011, 2013
Symposium on Cloud Computing (SOCC)	2012
Intl. SPIN Workshop on Model Checking of Software (SPIN)	2011

Committee Member

EPFL Doctoral School of Computer and	l Communication Sciences Audit Committee	2015
--------------------------------------	--	------

TEACHING

Introduction to Operating Systems (EECS 482) (undergrad level, University of Michigan) 2018, 2019 Advanced Topics in Operating Systems (EECS 582) (grad level, University of Michigan) 2017, 2019

RESEARCH MENTORING

PhD	
Tanvir Ahmed Khan	Jan 2018–
Kevin Loughlin	Sep 2018–
Andrew Loveless	Sep 2018–
Jiacheng Ma	Sep 2018–
Ian Neal	Sep 2018–
Ofir Weisse	Sep 2017–
Gefei Zuo	Sep 2018–
Undergraduate	
Yifan Dai	May 2018–
Liran Xiao	May 2018–
Yifan Zhao	May 2018–
Yimeng Zhou	May 2018–
